

COMDATA®

→ MasterCard® Fleet Card

Control spend. Drive revenue.

↘ The Comdata MasterCard Fleet Card is a comprehensive solution that helps you effectively manage fleet spending with universal acceptance, real-time controls, detailed reporting and fuel discount opportunities. Your drivers hit the road with the flexibility and security they need, while you control payments through Comdata's industry-leading platform to deliver an immediate and significant impact for your bottom line.

Gain Control Over Your Drivers' Purchases

- › Leverage the MasterCard network with acceptance at millions of locations worldwide
- › Purchase fuel and maintenance services according to company-defined standards, locations and policies
- › Limit activity to fuel only or fuel and maintenance

- › Provide enhanced, level 3 transaction data where available
- › Customize controls, real-time transaction monitoring and point-of-sale prompting requirements down to the individual card level
- › Use real-time account management to create groups, authorize and manage spending, review purchase details and assign GL codes according to your company's requirements
- › Access a variety of reports, from top-line summaries to real-time daily detail, and schedule delivery of selected reports
- › Integrate data into your existing ERP system or export it for additional analysis
- › Consolidate all fuel purchases, including mobile and bulk, into a single program

Comdata is a trusted, independent partner you can count on. With access to real-time data and reporting the Comdata MasterCard fleet solution delivers simplified payment processes, enhanced compliance and streamlined expense management.
