

COMDATA®

→ Virtual Payments

Reduce the cost of vendor payments and turn your AP department into a revenue generator

↳ Looking for a new and better approach to traditional accounts payable practices? Comdata ConnectPay features virtual payments solutions that can help you streamline the payment process, reduce costs and achieve incremental margin improvement.

Comdata ConnectPay provides a unique, dual-network capability for e-payables, offering the flexibility of both one-time use MasterCard® account numbers and straight-through payment processing with the ComdataDirect network. This adjustable approach will meet the needs of any supplier and deliver greater electronic payment acceptance for your organization.

Why use Comdata ConnectPay for virtual payments?

Enables a higher level of merchant participation

Processes payments safely and securely

Automates the payment and reconciliation process

Integrates seamlessly with most financial systems

Reduces processing costs associated with traditional check payments

Earns rebates while maintaining standard supplier settlement terms
