

Maintenance Pack 1.0 Release Notes

Maintenance Pack Release 1.0 for Expense Track Release 17.4 is available on 01/22/2018 and includes the following:

Resolved Defects

The following defects have been corrected:

- Typeahead fields for accounts coding will now retain values entered by users. Previously, if a user entered a value in a typeahead accounts coding field, saved it, and returned to it later, the value would disappear.
- If an expense is imported with an invalid charge-to location, the specific location ID will now display in the error message so Administrations know which location caused the issue.

For more information on the items listed, contact your Comdata representative.
